

INTRODUCTION

These tasks / tests are intended for students of medicine who are starting to learn their professional (medical) English. The tasks / tests cover texts and topics presented in the Units 1–9 of the textbook *Medicine Today* by Dr Trisha Greenhalgh. The tasks / tests are appropriate for various applications both in the classroom and at home, in parts, or as a whole. Students may be asked to come up with their own lists and then compare them to the ones in the tasks. All the tasks may also be presented as tests, depending on the situation (thus, two titles: tasks and / or tests). Every task may / should be extended by using the collocations made in students' own situations either in writing or orally, as class work, and as group / pair work. It can also be an individual task for homework. The tasks are followed by a Key with suggested / possible answers.
