

**VACCELERATE
VOLUNTEER REGISTRY
YOU TOO CAN BE PART
OF IT!**

WITHOUT PEOPLE LIKE YOU, MEDICAL PROGRESS WOULD NOT BE POSSIBLE.

FEEL FREE TO PASS THIS CARD ON TO FRIENDS AND RELATIVES AS WELL. SO THAT EVEN MORE PEOPLE CAN JOIN IN.

Anyone can become a volunteer and participate in clinical trials. Volunteers are very important for the development of medical research. Clinical trials are safe and subject to strict rules and laws. The EU project VACCELERATE, coordinated by the University Hospital Cologne, has set up a European database where people interested in participating in clinical trials can register. This way, groups of volunteers can be found quickly if necessary, e.g. for studies on COVID-19, polio, influenza or other respiratory infections. Registration does not commit you to anything. Only when you are invited to a suitable study do you decide whether you really want to participate. Register today!
